

Amith kuppili

Software Engineer

+91 8179223135 — amithkuppili@gmail.com — LinkedIn — GitHub

Summary

B.Tech graduate with hands-on experience in data analysis, BI dashboards, and automation workflows. Skilled in Python, SQL, and Power BI to build data-driven solutions, automate processes, and generate actionable insights for business decision-making.

Skills

Languages: Python, SQL, Java

BI & Data: Power BI, Data Analysis, Data Visualization, DAX (basic)

Automation AI: REST APIs, AI Tool Integration, Prompt Engineering, Workflow Automation, Scripting

Software Fundamentals: Data Structures, Algorithms, Debugging, Unit Testing

Concepts: ETL Basics, Data Cleaning, Data Modeling, Problem Solving

Projects

Stock Price Analytics Prediction System

- **Description:** Built a data-driven system to process and analyze stock market data using Python and time-series.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, FastAPI
- **Outcome:** Enabled structured data processing and real-time insights through API-based deployment, supporting data-driven decision making.

AI Automation Workflow for Data Processing

- **Description:** Designed an automation workflow using n8n to integrate APIs and process data through event-driven pipelines.
- **Tech Stack:** n8n, REST APIs, Python, JSON, Webhooks
- **Outcome:** Automated repetitive data workflows, improving efficiency and ensuring consistent data handling.

Hospital Data Analytics Dashboard

- **Description:** Developed an interactive Power BI dashboard using structured healthcare data.
- **Tech Stack:** Power BI, DAX, Power Query, Excel
- **Outcome:** Delivered insights on KPIs like occupancy rate, cost analysis, and patient trends for decision-making.

Achievements

- Participated in Smart India Hackathon (SIH) 2025, contributing to problem-solving and solution design in a competitive national-level hackathon.

Internships

Full Stack Web Development Intern — Slash Mark

Apr 2025 – Jun 2025

- Collaborated with clients and internal teams to understand requirements and deliver scalable solutions.
- Took ownership of assigned modules and ensured timely completion.

AI & ML with Data Science Intern — YBI Foundation

Dec 2024 – Feb 2025

- Applied machine learning models on real-world datasets using Python.
- Applied data preprocessing, feature engineering, and model evaluation techniques for predictive tasks.
- Built and optimized data-driven workflows for efficient processing and reporting.

Education

B.TECH in Electronics and Communication Engineering – Raghu Institute of Technology

CGPA :7.6/10

Expected Graduation: Mar 2026

Certifications

- Developer and Technology Job Simulation — Accenture
- Data Visualisation: Empowering Business with Effective Insights — TATA
- Python for Data Science — IBM
- AI for Beginners — HP Foundation
